

MISSION

DEXISIVE is committed to deliver our clients with supportable, scalable, and secure solutions to today's IT challenges.

FOCUS

DEXISIVE provides engineering services for Enterprise Infrastructures composed of Wired and Wireless Networks, and Data Centers.

EXPERTISE

DEXISIVE staff is trained and certified by the NSA INFOSEC Assurance Training and Rating Program (IATRP).

METHODOLOGY

DEXISIVE'S unique eXtreme Integration (Xi) approach delivers complex technology solutions with speed, quality, value, and accuracy.

AFFILIATION

DEXISIVE is a VA-Verified Service Disabled Veteran Owned Small Business (SDVOSB).

INNOVATION

DEXISIVE is a sponsor for the Mississippi State University Center for Computer Security Research.

A WOMAN-OWNED, SERVICE DISABLED VETERAN OWNED, SMALL BUSINESS

DEXISIVE was founded in 2005 to design and deploy technology solutions for medium to large enterprises with high quality and predictability.

Our Capabilities

DEXISIVE specializes in providing high quality engineering and technical support services to government agencies and commercial entities.

Our current service offerings include:

- Discovery and Assessment Services
- Engineering and Integration Services
- Implementation Services
- Operational Support Services
- Independent Validation and Verification Services
- Troubleshooting and Optimization Services

Information Assurance

DEXISIVE provides risk-appropriate network, host, and application security solutions. The DEXISIVE approach to secure the enterprise allows security managers to allocate resources to adjust to changing threats and business objectives. Security solutions also encompass Certification and Accreditation support and Vulnerability Assessment/Remediation. Alternative mitigation strategies are evaluated based on effectiveness, cost, and compatibility with technical and non-technical environmental factors.

Advanced Enterprise Management

DEXISIVE is an emerging industry leader in designing and deploying scalable, manageable, and functional enterprise infrastructure management solutions for Government and commercial clients. We develop and implement network and system performance management solutions, integrated voice/data services, business continuity solutions, and information storage for enterprises that demand agility and performance. Our focus is on integrating, implementing, and operating management and monitoring tools to enhance service availability and Fault/Security Incident Response.

Advanced Network Technologies

DEXISIVE solutions also include a wide range of advanced network technologies for LAN, WAN, and SAN environments. We design and implement Voice over IP (VOIP), IPV6, secure wireless access, and related services. Enterprises of all sizes will recognize enhanced service, supportability, scalability, and security from our skillful integration of industry leading network products and technologies.
